

RF Coaxial Lightning Protector (2-6GHz)

N male to N male Connector Type

The Lightning Surge Protectors listed on this page may also be referred to as: lightning suppressor, transient protector, spike arrester, surge arrester, lightning arrester, spike protector, surge protector, lightning protector, spike suppressor, RF protector. Spelling of these Product Specifications may also vary depending on location such as: lightning surge protector, RF protector, lightning suppresser, spike suppresser, spike arrester, surge arrester, and lightning arrester.

Specifications

| Technical Information | |
|-------------------------|------------------------------------|
| Product Name | 2-6GHz Lightning Protector (LP-16) |
| Description | N male to N male connector |
| DC breakdown voltage | 230 +/- 20% (100V/s speed) |
| Pulse breakdown voltage | <600V (100V/s speed) |
| AC current range | 20A |
| Pulse current range | 200A |
| Overvoltage protection | >150V (100mA, <150ms) |
| Isolation resistor | 1000m ohms |
| Transmission loss | -1.5dB |
| Frequency range | DC 2500MHz |
| Gap can | 1.5P |
